Enabling Techie Mode

Certain aspects of the product are disabled by default as they are geared towards developers. To unlock these features you need to enable what we call **Techie Mode.** This mode unlocks a menu in the AdminCP called **Techie** and enables Routing Tips. Additionally if you plan to release an app in our store you can only export your products when in **Techie Mode**.

Enabling Techie Mode

To enable techie mode, you need to create a file called **debug.sett.php** and place it in the folder **PF.Base/file/settings/** (if it does not exist already). We then need to add the techie constant in the file

```php
<?php

define('PHPFOX_IS_TECHIE', true);
```
