

# Configure Server to Force Using HTTPS for phpFox Site

## Configure Server to Force Using HTTPS for phpFox Site

### Cloudflare

In case you are using Cloudflare service, follow Cloudflare support to force your site to https

<https://support.cloudflare.com/hc/en-us/articles/200170536-How-do-I-redirect-all-visitors-to-HTTPS-SSL>

### HTACCESS

Make sure to replace example.com with the domain name you're trying force to https

```
RewriteEngine On
RewriteCond %{HTTP_HOST} ^example\.com [NC]
RewriteCond %{SERVER_PORT} 80
RewriteRule ^(.*)$ https://www.example.com/$1 [R,L]
```

### NGINX

On server config section add following lines

```
rewrite      ^      https://$server_name$request_uri? permanent;
```

example

```
server {
    listen      80;
    server_name signup.mysite.com;
    rewrite     ^      https://$server_name$request_uri? permanent;
}
```
