

# Status Background

Text statuses with a normal white background may be boring to users. People always love making their special, personalized and eye-catching status posts. This is what the Status Background app brings to your phpFox sites. With this app, users will be able to create their personal statuses easily with colorful backgrounds. The feed becomes more attractive and joyful to users. The Status Background feature was introduced on Facebook a few years ago and quickly becomes popular with people. It is obviously one of the Must-Have features for any social network site to get more user engagements.
