13	AdminCP >Storage System: Support merge added Storage items by Admin with configured Storage items from server environment
14	Support Search Members component for separate apps like Pages/Groups
15	New users can receive or send friend requests to others even the site is "Friends Only Community"

## Bugs Fixed

ID	Description
1	If enable "Multi-step Registration Form", it always shows "Captcha failed" when submitting the form at step 2
2	Unable to update/save the settings with valid data
3	If the setting "Can edit privacy settings for other users?" is disabled, then Admin cannot edit other user accounts although they have permission
4	If the setting "Who can view your location?" is No one, other users can still view user's location in some places
5	In the Privacy Settings page, if turn Profile and SMS/Email Notifications tabs off, then could not view other tabs (Items, Blocked Users, and Invisible Mode)
6	Missing Captcha at "2-Step Verification" page
7	Missing "Multi-step" in sign up process when users do not input Anti Spam Question
8	AdminCP >Custom field - Edit Selection/Radio/Checkbox field - Can save field after deleted all options
9	AdminCP >Add Custom field - Save wrong field name if the name is too long
10	Can view a post on a friend's wall but could not like, comment on it
11	In the Account Settings page, users can update their full name which the length is greater than the setting in the backend
12	Error 500 when turning off module Invite but turning the setting "Invite Only" on
13	AdminCP >Members>Browse Users: Results is not synchronized between searching and exporting data
14	AdminCP >Search settings - Show duplicate setting when search "Gender"
15	AdminCP >XSS Attack - Custom field has name contains JS script - Show popup whenever access to page has the field
