Upgrading the Product Package Type

Archives

You are using phpFox version earlier than 4.6.0? Please refer instruction for this article here.

If you've purchased a lite or basic package and would like to upgrade to a higher one, please follow the below steps.

- Log in to your Client Area.
 In your Client Area, you'll see your phpFox active license there (for example Pro package)

phpFox	🚖 Services - Billing -	Support - Affiliates	Quick Access -	~ * * # 2

• Done

How to Enable the Features/Modules

Now that you have purchased and updated your license in your client area, you need to enable the new features. If you are on the most current version, you can just enable them via the toggle modules area.

If you are not on the current stable release, please log into your account and download the latest version and perform an upgrade. Your new features should automatically enable.

```
Clear cache.
```

Upgrade the phpFox Package in phpFox site

If you want to upgrade your phpFox package: from Lite/Basic to Basic/Pro, please follow the instructions below:

• First, replace the content of the file PF.Base/file/settings/license.sett.php with the code:

```
<?php
define('PHPFOX_LICENSE_ID', 'techie'); define('PHPFOX_LICENSE_KEY', 'techie');
```

Next, go to Admin CP of your site, you can see the link License key in Settings menu, click on the link. In the next page, you can enter new license information:

SSL	Liconso kov
Server Settings	LICETISE KEY
Site Settings	
Spam Assistance	Enter your license ID & Key:
Timestamp	
Storage System	License ID
Assets Handling	
Log Handling	
Session Handling	
Message Queue	
Time Zones	Save changes Cancel
Short URLs	
URL Match	
Registration Settings	
Notification Settings	
Data Cache	
Cron Job	
Anti-SPAM Questions	
Cancellation Options	
License key	
🗲 Maintenance 🛛 🗡	

• Finally, clear cache on your site.

Congratulation! You have upgraded your phpFox package successfully.
