# **Setting Up the Facebook App**

#### Archives

Are you using a phpFox version earlier than 4.6.0? Please refer to instruction for this article here.

Since Facebook is one of the largest and most popular social network sites for the publicity, many people would like to use their Facebook accounts to join to other networks. By using Facebook Connect app, your users can join your community conveniently by logging in with their Facebook account.

This guide will instruct you to set up the Facebook login for your site using Facebook Connect.

## Create a Facebook Application

- · Go to Facebook Developers page and Login to your Facebook account.
- From header menu, select My App , then Create app

1. Enter the **Display Name** and **Contact Email** for your app and click on **Create App ID** to create your app. You might need to enter the captcha to verify.

### Create a New App ID

2.

Get started integrating Facebook into your app or website

Display Nar	me

Contact Em	nail		
phpfox@p	phpfox.com		
By proceeding	g, you agree to the Facebook Pl ngs from left menu >> Basic co	atform Policies ontent will show up on the righ	Cancel Create App ID
phpfox_demo	✓ APP ID: 2176126405942331		OFF Status: In Development View Analytics
✿ Dashboard ✿ Settings Basic	App ID 2176126405942331	App Secret	Show
Advanced	Display Name	Namespace	

 On Setting content, you will see App ID. Click on Show button to reveal App Secret. Now you already have both App ID & App Secret to use with Facebook Connect app. However, you need to configure your Facebook app a little bit more to make it fully works. 4. Choose Settings from the left menu and select Basic. Enter your website URL , App Domains, Contact email and hit Save changes

phpfox_demo	APP ID: 2176126405942331	OFF Status: In Development - View Analytics

	A Dashboard ☆ Settings >> ™ Roles >>	Make phpfox_demo public?	) t and unavailable to the	public.					

8. Now you finish setup your Facebook app. Go back to **Dashboard** and note down **App ID & App Secret** of your Facebook app. We need these 2 information for next step.

#### Opdate 2021

As of early 2018, Facebook is making a security update to app settings that will invalidate calls from URIs not listed in the Valid OAuth redirect URIs. This update comes in response to malicious activities, and Facebook wants to protect your app or website by requiring a new strict mode for redirect URIs.

To make sure your Facebook app work well with phpFox and just in case your app doesn't work please do some additional steps:

From <b>Product</b> > c	From Product > click on Add product, choose Facebook login							
phpFox1	▼ App II	<b>0:</b> 4860955447355893 <b>App Type:</b> Bu	isiness			() H		
		Facebook Analytics will no longer be available af	fter June 30, 2021. For more informatic	on visit the <u>Business H</u> e	elp Center. 🗙
