

Adding and Managing Announcements

Archives

You are using phpFox version earlier than 4.6.0? Please refer instructions for this article [here](#).

This tutorial will show you how to add and manage Announcements for your site. These are on-site announcements and are not sent out by emails (Newsletter). These show based on the settings you set when creating the Announcement.

- [Adding an Announcement](#)
- [Editing, Deleting, Enabling or Disabling Announcements](#)
- [Allowing Users to Close Announcements](#)

To manage Announcement, please go to your AdminCP, Click Apps >> Installed >> Announcement.

Adding an Announcement

- To make a new announcement, click New Announcement tab. Fill in the Subject for this Announcement for each language you have installed. Fill in the Intro text, for each language you have installed, which is usually just a short introduction to the announcement.

- Fill in the Announcement main text now for each language installed.

Announcement Content in English (US)

- Toggle button to Activate/Deactivate Display options, select style.

- Toggle button if an announcement can be closed then select the starting date

- Set the Start Date and Time.

Start Date:

5/3/2018  at 04 : 34

- Target Viewers - select from the drop-down menu which user groups you want to be shown this announcement or leave it to All User Groups.

Target Viewers
