

# Managing Apps

## Archives

You are using phpFox version earlier than 4.6.0? Please refer instruction for this article [here](#).

*This tutorial will show you how to manage Apps for your website. This assumes you are already logged in as the Admin user and are [logged into the AdminCP](#).*

## Requires:

- **phpFox 4.6+**

In AdminCP, Go to Apps >> Installed. The Management Page is something like this:

The screenshot shows the phpFox AdminCP interface. The top navigation bar includes the phpFox logo, a search settings bar, and user information for Albert Santiago, Administrator, with a 'View Site' link. The left sidebar contains a menu with 'Dashboard', 'Apps' (highlighted), 'Installed' (with a red arrow pointing to it), 'Purchase History', 'Find More', 'Globalization', 'Appearance', 'Members', 'Settings', 'Maintenance', and 'Logout'. Below the sidebar is a 'Clear All Caches' button. The main content area is titled 'Manage Apps' and features a search bar for app names. Below the search bar is a table listing installed apps.

Name	Version	Latest	Author	active	Settings
PF	4.5.2		phpFox	OFF	
Ads	Core	Core	phpFox	OFF	
Amazon CDN	4.5.4	4.5.4	phpFox	ON	
Announcement	4.6.0	4.6.0	phpFox	ON	
Attachment	Core	Core	phpFox	ON	
Backup and Restore	4.1.1	4.1.2 Upgrade Now	phpFox	ON	
Better Ads	4.1.3		phpFox	OFF	
Blogs	4.6.1	4.6.1	phpFox	ON	
Captcha	4.6.0	4.6.0	phpFox	ON	
Comment	Core	Core	phpFox	ON	

s page will list all installed apps on your site (both Core apps and Third-party apps)

- **VERSION:** the current version of the app on your site
- **LATEST:** the latest version of the app that published in the [store](#). A link for the upgrade will be shown if the current version of the app on your site is smaller than the latest version.
- **AUTHOR:** developer/company who published this app.
- **ACTIVE:** toggle button to enable/disable the app.
- **SETTINGS:** Revalidation, Uninstall, and Export app option
