

How to Change/Add User Picture Profile

Archives

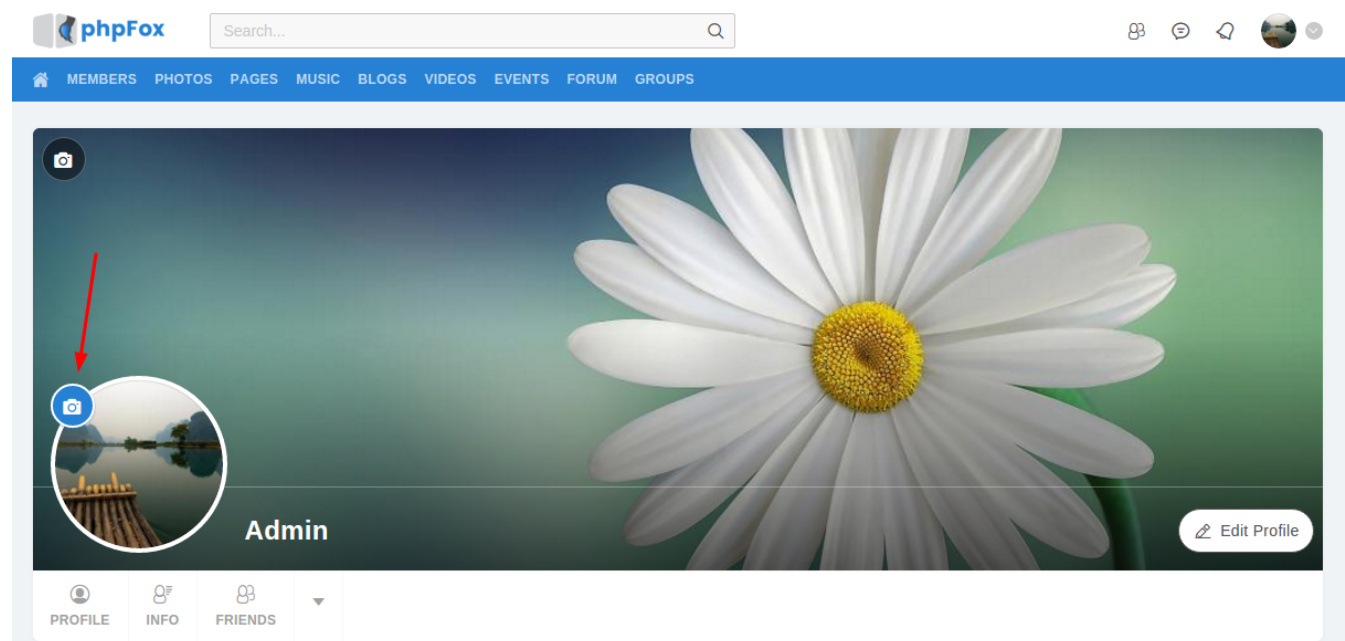

You are using phpFox version earlier than 4.6.0? Please refer instruction for this article [here](#).

There are 2 ways for users to change/add their profile picture:

- Upload photo from their device.
- Use an existing photo.

Upload photo from device

Go to User Profile Page, you will see the button to upload a new photo top left of the display picture. Click on the button and select the photo you want to use the profile picture and upload it.

Use an existing photo

Requires:

- **phpFox 4.5+**

Go to any photo detail pages on the **phpFox** site, users can see the Make Profile Picture option to set this photo as a profile picture.
