

# Configure Site Name, Copyright, Meta Keyword, Meta Description

## Archives

You are using phpFox version earlier than 4.6.0? Please refer instruction for this article [here](#).

This article will show you how to set a configure info of Site Name, Copyright, etc. This assumes you already [logged into the AdminCP](#). Here are the next steps:

- On Side menu in AdminCP, Click on Tools - Settings > Site Settings
- You can see text boxes to configure info of Site Title, Copyright, Meta Keyword, Meta Description and other site info on this page

The screenshot shows the phpFox AdminCP interface. On the left is a dark sidebar menu with options: Dashboard, Apps, Globalization, Appearance, Members, Settings (highlighted), Browser Cookies, Mail Server, SEO, SSL, Security, Server Settings, Site Settings, Spam Assistance, Time Stamps, Short URLs, URL Match, and Performance. The main content area is titled 'Search settings...' and contains the 'Site Settings' configuration. It includes four text input fields: 'Site Title' (containing 'Social Networking Community'), 'Copyright' (containing 'phpFox ©'), 'Site Title Delimiter' (containing '\*'), and 'Meta Keywords' (containing 'social networking, phpFox demo'). Below these fields is a note: 'Enter the meta keywords for all pages. These are used by search engines to index your pages with more relevance. Note that certain modules or pages have their own meta keyword settings and if those are set they will override this setting.' At the bottom right of the form is a blue 'Save Changes' button. The top right of the page shows the user 'Albert Santiago Administrator' and a 'View Site' link.

- After modifying settings, click on **Save Changes** button at the bottom of the page to save your changes
