

# Configure Site Name, Copyright, Meta Keyword, Meta Description

## Archives

You are using phpFox version earlier than 4.6.0? Please refer instruction for this article [here](#).

This article will show you how to set a configure info of Site Name, Copyright, etc. This assumes you already [logged into the AdminCP](#). Here are the next steps:

- On Side menu in AdminCP, Click on Tools - Settings > Site Settings
- You can see text boxes to configure info of Site Title, Copyright, Meta Keyword, Meta Description and other site info on this page

The screenshot shows the phpFox AdminCP interface. On the left is a dark sidebar with a menu. The 'Settings' option is highlighted in blue, and 'Site Settings' is selected. The main area is white and contains four configuration sections. Each section has a title, a text input field, and a brief description. The 'Site Title' field contains 'Social Networking Community'. The 'Copyright' field contains 'phpFox ©'. The 'Site Title Delimiter' field contains '\*'. The 'Meta Keywords' field contains 'social networking, phpFox demo'. At the bottom right of the main area is a blue 'Save Changes' button. Above the 'Meta Keywords' field is a small note about meta keywords.

- After modifying settings, click on **Save Changes** button at the bottom of the page to save your changes
