

Configure TimeZone and Time Format

Archives

You are using phpFox version earlier than 4.6.0? Please refer instruction for this article [here](#).

Compatibility

This article is compatible with phpFox 4.6.0 and above.

[Click here for phpFox 4.5.3 Users](#)

Setup the default time zone for your site to avoid confusion while tracking actions. This article will guide you how to configure TimeZone and Time Format on your phpFox site. We assume that you already [log in AdminCP](#). Here are next steps:

- On Side Menu in AdminCP, go to **Settings >> Time Stamps**

phpFox Search settings... Albert Santiago Administrator View Site

Time Stamps

Default Time Zone

Africa/Abidjan

Select the default time zone for guests and new users.

Global Time Stamp

M j, Y

Each module has items that are displayed and use our time stamp settings to display the date the way we would like.

If a module does not specify a time stamp setting it will use the default time stamp layout which is controlled with this setting.

For a better understanding on how to modify this setting and what the string values stand for you can follow up on the PHP date() function [here](#).

Feed Time Stamps

F j, Y g: a

Time stamps displayed on feeds.

User D.O.B (Month, Day & Year)

Save Changes

- At Default Time Zone, select your desired time zone you want to set on your site from the list. From here, you can also change the format of showing date and time on site. Refer here to know how to enter the correct format: <http://php.net/manual/en/function.date.php>
