- Some notices:
 - If a group does not have category on SE site, after importing, its category on phpFox will be the first category
 - System could not import FLV videos from SE to phpFox site because phpFox is using html5 video player
 - System does not import notifications
 - System will not import the duplicated users. That means if user A already exist on both SE site and phpFox site, system only import data of A from SE site to phpFox site

- Admin can import an SE site many times, or import many SE sites to a phpFox site and system will not check the duplicated data. Hence, to avoid the duplication, admin should consider carefully before process the importing many times
- During importing, system update counter for each section. But admin should run the update counter manually after imported
- Discussion from a group will not be imported
- Should increase server timeout while importing (most of server have default php max_execution_time is 30s). If your site has many data, a step can spend many minutes to be done. See more detail at <https://easyengine.io/tutorials/php/increase-script-execution-time/>
