

phpFox 4.5.1

New Features / Improvements

No	Features	Note
01	Change the core apps' names	The core apps' names of phpfox will not include "phpFox" term anymore
02	Change layout of comment	If you're using the theme which the feed / comment is being costumed, your Home Page may need some updates to match with new style of comment
03	Allow to upload multi-photos while creating new feed	Support both Home Page, User Profile Page, Page and Group
04	Show total views of videos posted in Group or Page	
05	Have an option for admin to decide whether to include a custom field in search or not	Apply on both Browse Members at Front End and Search Users at AdminCP
06	Keep users stay in page after delete videos in page successfully	
07	Show photo on Facebook after share photo successfully	
08	Show thumbnail on Facebook after share video successfully	
09	Have option to show both first name and last name on the registration form	
10	Support to send an email to buyer to notify about a new purchase	
11	Allow admin to select which criterion will be used for sorting feed by top stories: sort by total likes, total comments or both	
12	Default setting of "Friend Only Community" will be "False"	
13	All core apps are now working in the same rule while integrating with Page and Group	If users create items on page / group - Owners can view their own items on the corresponding apps in My Items pages as My Events, My Blogs and so on. - These items should not be displayed on Home Page of the corresponding apps. Other members could not see them. - Other members can view these items on page / group detail if they have permission to view them. If users create items on private group - Do not have feed on Home Page
14	Add new menu Membership to allow members to go to this page quickly	Click on "Settings" button at the top right corner to see the Membership menu, which is being put behind the "Privacy Settings"
15	Have an option for admin to choose whether to remove database while uninstalling app or not	
16	Support multilingual for categories in Reported Items	
17	Do not show profile photos in Recent Photos block in User Profile if the setting "Display Profile Photo withing Gallery" is disabled	
18	Add some default folders while creating new app	Default folder include: Assets, Block, Controller, Hooks, Service, Views
19	Translation of phrases in the title groups	
20	Remove temp file after install successfully	
21	Support check app compatible with the Core	If version of phpFox on the site is lower than the min required version of the app, the admin won't be allowed to install it.
