Setting Redirect After Signup or Login

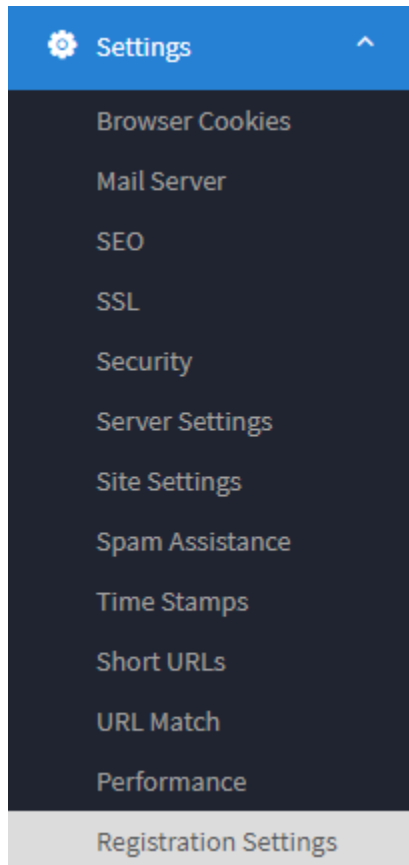

ⓘ **Archives**

You are using phpFox version earlier than 4.6.0? Please refer instruction for this article here.

You may want to set the Redirect after a user joins or logs into your site. For example, new users tend to have a hard time finding the privacy settings and don't always see the tutorials you might have made. You can set a redirect after signup to the privacy page. We'll use that as our example for this tutorial.

Redirect After Signup

- In Settings, choose Registration Settings

⚙ **Settings** ⌃

Browser Cookies

Mail Server

Server Settings

Site Settings

Spam Assistance

Time Stamps

Short URLs

URL Match

Performance

Registration Settings

- Scroll down to the Redirect After SignUp and put your URL user/privacy if you want to redirect to the user privacy.

Redirect After SignUp

user/privacy

Add the full path you want to send users right after they register. If you want to use our default routine just leave this blank.

- Clear your cache and test. You should see that you go to the user/privacy page if you try signing up, once the sign up is completed.

ⓘ **Tip**

Please note to clear cache any time you make any changes.
