

Add items to AdminCP Alert Section

Requires: phpFox version 4.6.0 or later.

The below instructions can help you add your items to **Alert** section in **Admincp** (admincp/alert).

- Add a plugin name with admincp_alert_item and add your item to array \$aItems.

Example:

```
<?php
// filename admincp_alert_item.php

$aItems[] = [
    //link of the page that allow admin can manage your alert items
    'link'=> \Phpfox::getLib('url')->make('admincp/blog/pending'),
    //message you want to show in alert section
    'message'=> 'You have 12 pending blog posts.',
];
```
