Configure Server to Force Using HTTPS for phpFox Site

Configure Server to Force Using HTTPS for phpFox Site

Cloudfare

In case you are using Cloudflare service, follow Cloudfare support to force
your site to https
https://support.cloudflare.com/hc/en-us/articles/200170536-How-do-I-redirect-all-visitors-to-HTTPS-SSL

HTACCESS

Make sure to replace example.com with the domain name you're trying force to https

```
RewriteEngine On
RewriteCond %{HTTP_HOST} ^example\.com [NC]
RewriteCond %{SERVER_PORT} 80
RewriteRule ^(.*)$ https://www.example.com/$1 [R,L]
```

NGINX

On server config section add following lines

```
rewrite     ^   https://$server_name$request_uri? permanent;
```

example

```
server {
    listen      80;
    server_name signup.mysite.com;
    rewrite     ^   https://$server_name$request_uri? permanent;
}
```
