

# Marketplace

As the booming of E-Commerce, Marketplace app is like an online department store that serves as a convenient destination for users to discover, buy and sell items within the community. It is a simple yet effective solution for users to sell their products, or look through others' listings and search for the great things to buy. The app features many filters to make sure users can find the exact product they are looking for. It has flexible ways to buy products and an organized system of the invoice to manage purchases.
