

# Event

How to let people know and invite them to the party that you host? How to let people know about something new you just invented? Events app is the answer to these questions. With Events app, you can create your own event by specifying time and venue of the event, along with images and event description. You can send invites to certain people or just leave it open for public so anyone can join in it. For the invited people, they have a choice to deny, consider or attend the event. All the events are well organized into categories and easily referenced using search and filters.

## Notice:
