18	Remove notifications of link-related feed items after deleted "link" post
19	Move Validator Regex Rules to AdminCP > Global Settings

## Bugs Fixed

ID	Description
1	Can access to app setting page even though the app is disabled
2	When editing status that has a "mention" at the end on Firefox, can not add text after the mention
3	The strange code intermittently displays when clicking the "Back" button of the browser
4	Multiple profile image upload <a href="#">#3011</a>
5	Login with Google doesn't work when Bundle JS is enabled
6	Show error when re-validate/upgrade apps in AdminCP > Uploaded
7	Layout Issues with Bootstraps and Responsive
8	Issue when sharing Facebook URL
9	When like a comment that mentions friends, show tags in the notification content
10	After hiding all feed from user/page/group, clicking on the links of user/page/group goes nowhere
