

How to increase video size upload in phpFox?

Archives

You are using phpFox version earlier than 4.6.0? Please refer instruction for this article [here](#).

The phpFox script supports uploading videos. And as admin of the site, you'd be able to change the size limit for all the video uploads. In this article, you will learn on how to increase the video size upload in your phpFox site.

NOTE:

- *The max upload file size is also restricted by PHP params: `post_max_size` and `upload_max_filesize`. You can contact your hosting provider for assistance to increase these params. We also have an article on this topic [here](#).*
- *In order to increase max upload size for other apps such user profile photo, events, photos, ... you can follow steps in this article but choosing corresponding apps in Manage User Settings page. For example: setting of user profile photo is in "User" app*

Let's start now!

66 Status Photo Videos

Drag and drop video file here

Supported File types: 3GP, AAC, AC3, EC3, FLV, M4F, MOV, MJ2, MKV, MP4, MXF, OGG, TS, WEBM, WMV, AVI
Maximum File size is 100 Mb.

Simple steps on how to increase the video size upload in phpFox

First, you need to login to your site as an Admin.

Go to User Groups to manage the settings of the user group. By default, phpFox script has 4 different UserGroups as shown in the picture below. But you can add more user groups as you want.

Select the specific UserGroup that you would like to increase the video size upload. After selecting the specific user group, select the Video under the Core Apps settings.

By default, the script maximum video file size under the Registered User is 10MB. You can change this value to any value you want.

After changing the value of Maximum file size of video uploaded (MB) to 100, click Save Changes.

Apps: Video

Groups: Registered User

User Group Settings

Can share/upload a video? ☒ YES

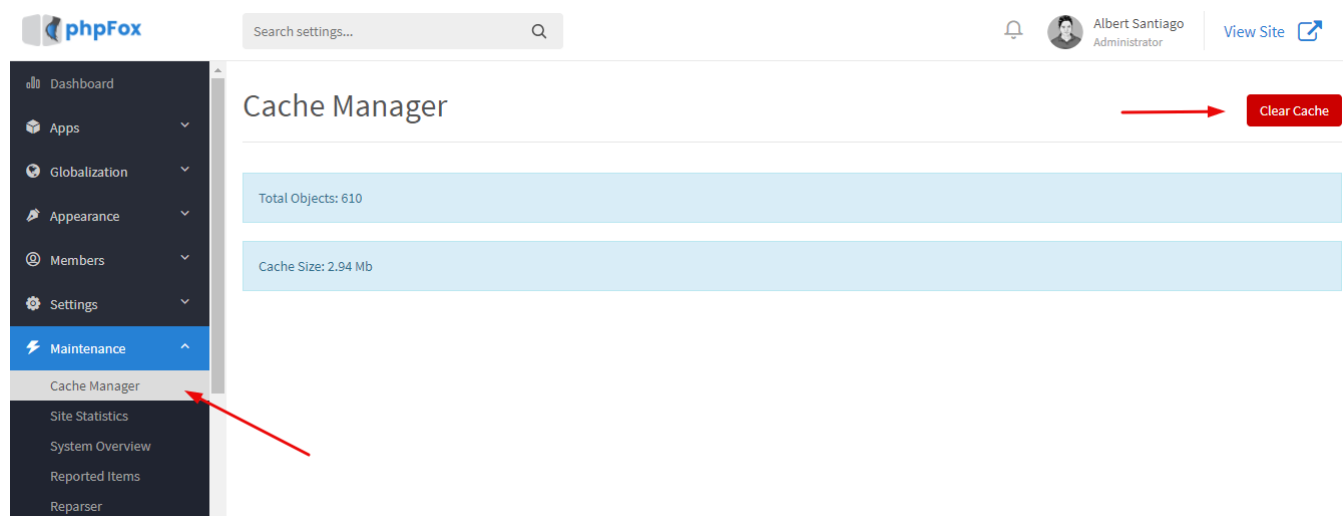

Maximum file size of video uploaded (MB)?

100

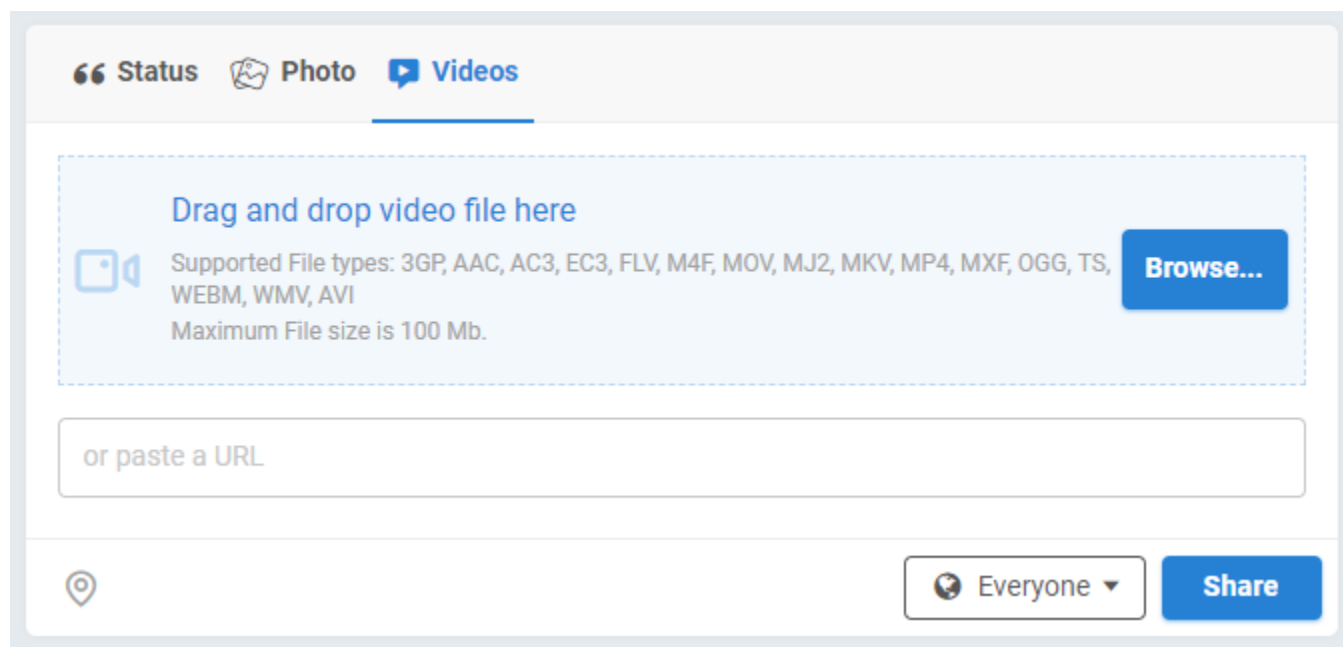

Maximum file size of photo uploaded (KB)?

500

After Saving the changes, you will need to clear the cache in order for your changes to take effect. Just go to **Maintenance >> Cache Manager** > click **CLEAR CACHE** button.

After clearing the cache, you can go back to your site's frontend and check if the video upload size setting was changed.

As you can see, the Max file size for the video upload was changed to 100MB.

From now on, you will be able to control the file size of the videos your members can upload to your site.
