

Adding and Managing Attachments

Archives

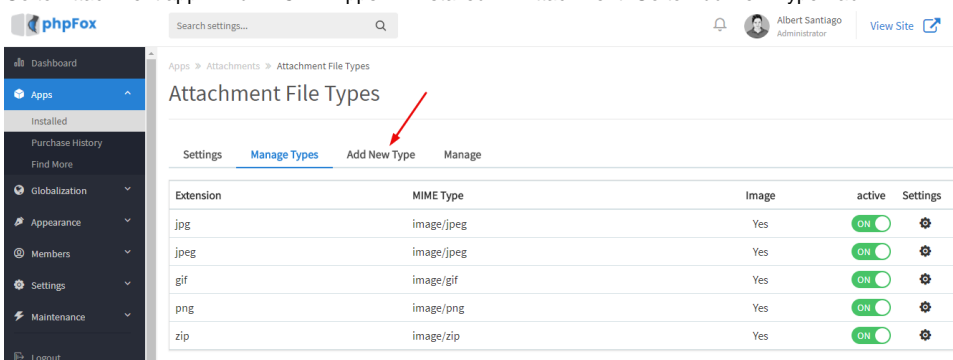

You are using phpFox version earlier than 4.6.0? Please refer instruction for this article [here](#).

The phpFox script gives you full control over attachments. This tutorial will help you learn how to add, edit and manage attachments for your site.

- [Adding Attachment Types](#)
- [Editing Attachment Types](#)
- [Enable or Disable Attachment Types](#)
- [Managing Attachment Thumbnails](#)
- [Managing Thumbnail Size](#)
- [Managing Attachments \(v4.6 and up\)](#)

Adding Attachment Types

- Go to Attachment app in AdminCP > Apps >> Installed >> Attachment. Go to Add New Type Tab

- You'll see a popup with boxes to fill in. We will use .zip as an example of our attachment. You will need to look up the various attachment Mime types in order to add whatever attachments you want to add. For zip, fill it in like this:
 1. Extension - for our example we put zip without a period in the front.
 2. MIME type - for our example it is application/zip.
 3. Image - No as this is not an image type of attachment.
 4. Active - Yes as we want to activate this.
 5. Submit when done.

Apps > Attachments > Add an Attachment Type

Add an Attachment Type

Settings Manage Types **Add New Type** Manage

Add an Attachment Type

Extension 1

MIME Type 2

*Is Image 3 ☐ NO

*active 4 ☒ YES

Submit

Editing Attachment Types

- Go to Manage Types tab. Find the attachment you want to edit and click the setting icon and choose Edit.

Apps » Attachments » Attachment File Types

Attachment File Types

Settings **Manage Types** Add New Type Manage

Extension	MIME Type	Image	active	Settings
jpg	image/jpeg	Yes	<input checked="" type="checkbox"/>	<div>Edit</div> <div>Delete</div>
jpeg	image/jpeg	Yes	<input checked="" type="checkbox"/>	
gif	image/gif	Yes	<input checked="" type="checkbox"/>	
png	image/png	Yes	<input checked="" type="checkbox"/>	
zip	image/zip	Yes	<input checked="" type="checkbox"/>	

- Change the values in the popup as you want them and Submit when done.

Enable or Disable Attachment Types

- Go to Manage Types tab. Toggle button to enable /disable attachment.

Apps » Attachments » Attachment File Types

Attachment File Types

Settings **Manage Types** Add New Type Manage

Extension	MIME Type	Image	active	Settings
jpg	image/jpeg	Yes	<input checked="" type="checkbox"/>	
jpeg	image/jpeg	Yes	<input checked="" type="checkbox"/>	
gif	image/gif	Yes	<input type="checkbox"/> Deactivate	
png	image/png	Yes	<input checked="" type="checkbox"/>	
zip	image/zip	Yes	<input checked="" type="checkbox"/>	

Managing Attachment Thumbnails

- Go to the Settings tab. You can add attachment types to the thumbnail settings so it shows a default icon for each type.

Add a New Value...

Add

Define what file extensions we should create thumbnails for when a user uploads an image attachment.

Managing Thumbnail Size

- Scroll down to the Thumbnail sizes and you can change the values to what you want. You might need to tweak your theme to fit in bigger or smaller sizes.

Thumbnail Width/Height

120

Define the width and height of the thumbnail that will be created after a user uploads an image. If the image uploaded is smaller then the specified width/height it will not create a thumbnail for the image.

Medium Thumbnail Width/Height

400

Define the width and height of the medium thumbnail that will be created after a user uploads an image. If the image uploaded is smaller then the specified width/height it will not create a medium thumbnail for the image.

Note that the medium thumbnail is displayed on the website instead of the original image to save bandwidth.

Managing Attachments (v4.6 and up)

- Go to Manage tab. You can search for specific attachment name.
