

phpFox 4.6.1

Hooks/Plugins

We have some new hooks/plugins to support developers can make change on the core features:

ID	Name	App	Description
1	feed.component_block_edit_user_status_end	feed	Plugin called at the end of the Edit User Status block.
2	core.template_notification_list_start	core	Template plugin called at the begin of notification block.
3	core.template_notification_sm_list_start	core	Template plugin called at the begin of notification block (tablet screen).
4	core.template_notification_xs_list_start	core	Template plugin called at the begin of notification block (phone screen).

Template Utilities

In this version, we have supported a new template utility to render checkboxes for selecting genders **checkbox_gender**

```
{checkbox_gender use_custom=true}
```

To get detail information or the full list of supported utilities, please look over this [document](#).

Deprecated Settings

In this version, we have checked to deprecate all core un-used settings. Below is the detail list. All of them will be removed completely in phpFox 4.7.0.

Setting Var Name	Added Version	Type
ad.ad_cache_limit	2.0.0beta3	integer
ad.ad_ajax_refresh	2.0.0beta3	boolean
ad.ad_ajax_refresh_time	2.0.0beta3	integer
