

phpFox 4.6.1 Build 2

Fixed Bugs

ID	Bug
1	Translated phrases are lost after upgrading to 4.6.1.
2	Site shows blank page after upgrading to 4.6.1 in case using a clone theme of Material 4.6.0
3	Problem installing the site if using CloudFare.

***Note:** For any clients who did try upgrading to version 4.6.1 and are having one of 3 issues above, you won't be able to use the package 4.6.1b2 to fix the problem. Instead, please refer to this [page](#) for the complete solution in installing/upgrading your site. Or feel free to contact us in Client Area. We are more than glad to help you.*
