## Notice

To support the ability to export user data, the [Material template](#) and [Single Device Login app](#) also require being updated along with Core version 4.6.1b3. The new versions of these products are now available on [phpFox Store](#). If you are using the [Material template](#) and [Single Device Login app](#), please don't forget to upgrade them to their latest version as well right after upgrading the phpFox Core.

## Changelog

See the complete changed file list [here](#).
