

# How to go live with OBS

**OBS Studio (formerly Open Broadcaster Software or OBS, for short) is a free and open source software for video recording and live streaming and in this walk-through we'll introduce you about how to setup and go live with OBS.**

In order to start Livestreaming on the website with **OBS**. First of all, you need to install a streaming software into your desktop/personal computer. There is a lot of free Streaming software on the internet, however, you can search for "**OBS Studio**", then download and install it in your desktop/PC. You can also refer this link: <https://obsproject.com/> to download **OBS Studio**.

**After successfully installing Streaming software (OBS studio) into your desktop/PC, then from your phpFox website>Press Go live to get Stream Key + Server URL>Copy them.**
