Music - Changelog

Version 4.6.8

Information

- **Release Date:** February 11, 2022
- **Best Compatibility:** phpFox >= 4.7.8

Improvements

- Integrate notification and email when creating new item in Page
- Hide unnecessary settings for Guest user group
- Change text from track to song when deleting an album
- Hide all feeds of Song/Music Album/Playlist when setting "Can browse and view the music app?" is disabled
- Move setting "Can browse and view the music app?" to the top
- Add a setting defined that how many minutes the user group should wait before they can add new song/music album/playlist
- In User profile page, hide pending songs under Music tab
- Improvement for Core Global Search
- Hide "Add to new playlist" function when logging in as Page
- Replace text "track" to "song"
- Validate the settings of " The maximum number of music songs/albums that members can create"
- Hide "Add to playlist" button on the Song Detail page for guests

Fixed Bugs

- "Time to wait before user can upload another batch of songs/albums/playlists" setting does not work
- All/My Albums: Search feature does not work
- User (creator) who has permission to view the private song but cannot search that song on global search
- User can create item (Music/Album) inside Page although this module has not been integrated with page
- The privacy of playlist is not correct
- User Profile: Users can see the private song on "Latest Songs" widget
- The content of the error message is shown the same when accessing invalid link
- Manage Songs in Playlist: Wrong grammar
- Turn off "Allow posting on Main Feed" setting - Missing user's name on re-share album feed
- Integrated with Chat plus site - Songs list - Online status dot is cut
- Album Music: Although user created 4 albums of music but it only shows with 3 albums in "Album" list of creating new song page
- Playlist: The notification is not correct after user tries to like/comment music playlist
- Song: Genres is not listed when a user edits a song
- My Albums: Missing "Sponsored" icon in album music detail page
- My Albums: Missing "Featured" icon in album music detail page
- My Albums: Tab is not focused correctly after user tries to edit a song
- Settings "Maximum number of songs per upload" does not work
- My Playlists: The attachment file does not work when creating new playlist
- Mass Action: No action is happened after making the feature of Songs in "Mass Action"
- My Songs: Search by "Genres" does not work
- Users can still create new playlist on feed although the setting of "Can browse and view the music app?" is disabled
- User cannot create a playplist
- XSS Attack: Album: There is no action happened when creating an album with XSS scripts
