

Setup new client

You can add a new client by going to the backend settings of the app.

AdminCP >> Installed Apps >> RESTful API >> Click on New Client button

The screenshot shows the phpFox AdminCP interface. The left sidebar contains a menu with options like Dashboard, Apps, Installed, Purchase History, Find More, Globalization, Appearance, Members, Settings, Maintenance, and Logout. The main content area is titled 'Apps > RESTful API' and has two tabs: 'Settings' and 'Clients'. The 'Clients' tab is active, showing a table with columns: ID, Secret Key, Name, and Active. There is one client listed with ID 123, Secret Key 48eb2c..., Name Harry, and Active status ON. A red arrow points to a 'New Client' button in the top right corner of the table area. At the bottom right, there is an 'Uninstall' button.

ID	Secret Key	Name	Active
123	48eb2c...	Harry	ON

A popup will show up, here you will need to input:

The 'New Client' popup form has a title bar with a close button. It contains three input fields with placeholder text: 'mobileapi', 'client_name', and 'http://localhost/'. A blue 'Submit' button is located at the bottom left of the form.

- **Client ID:** Enter here a unique client ID you want to assign to the client.
- **Client Name:** Enter here the client's name.
- **Redirect URI:** Enter here the URL you want the client to redirect after verification.

Hit **Submit** to add a new client.

The new client will be listed in **Clients** list with an **auto-generated Secret Key**.
