3	Add First/Last to pagination to quick navigation. (Github #2519)
4	Improvements on the layout when hovering on the username.
5	Update language & phrases for verification messages & group name. (Github #2531 , #2493)
6	Hide 'Everyone' and 'Friends of Friends' in posting privacy when the privacy of Feed is set to "Friend Only". (Github #2399)

Bug Fixes

ID	Bug Fixes
1	Can't access installed apps if phpFox Store is down or unavailable. (Github #2555)
2	The status isn't updated after sending or confirming friend request until page refreshing.
3	Thumbnail image of user profile doesn't update until the cache is cleared. (Github #2565)
4	The line break will automatically have an empty line added. (Github #2562)
5	Can't cancel or save cover photo when repositioning.
6	If the category list of a blog is long, the categories don't fully show up on the feed of user profile.
7	The blocked user still appears when there is friend request to that user.
8	Privacy settings are reverted when update Profile menu settings.
9	Custom gender can be saved with 'space' character.
10	The URL in a feed is not parsed again if there is already another feed with the same URL. (Github #2559)
11	The deactivated menu will be re-activated after re-arranging menu order. (Github #2542)
12	Site-wide block 3 or 10 is placed in unusual position after refreshing the page. (Github #2527)
13	Searching with the custom field still binds to the previous parameters. (Github #2544)
14	Remove hyperlink for all external URLs (Github #2563)
