How to Send Reminders to Inactive Members?

As the site owner, you would like to send reminder emails to the members if they have not logged in for a long time. This is important since it helps catch some users who otherwise would leave the site permanently.

Log into your AdminCP and click on Members > Inactive Members

In this page, you can get a list of Inactive Members and send the reminders message to them.

This feature will send emails with the email content of the phrase "user.mail_inactive_users". You may like to go to **Globalization > Phrases** to search and update this phrase if you want.
