

How to log in as another user without entering a password?

Sometimes, as the Administrator of your social network may want to log in with other user accounts to do specific tasks. This tutorial will guide you on how to do that without having a corresponding user password.

This assumes you are already logged in as the Admin user and are [logged into the AdminCP](#).

In AdminCP, select **Members > User Group Settings** and then select "User" from "Apps" drop down, "Administrator" from "Groups" drop down

User Group Settings » Administrator (ID#1) [Create User Group](#)

Apps: User Groups: Administrator

User Group Settings

Can add/edit settings for user groups? YES

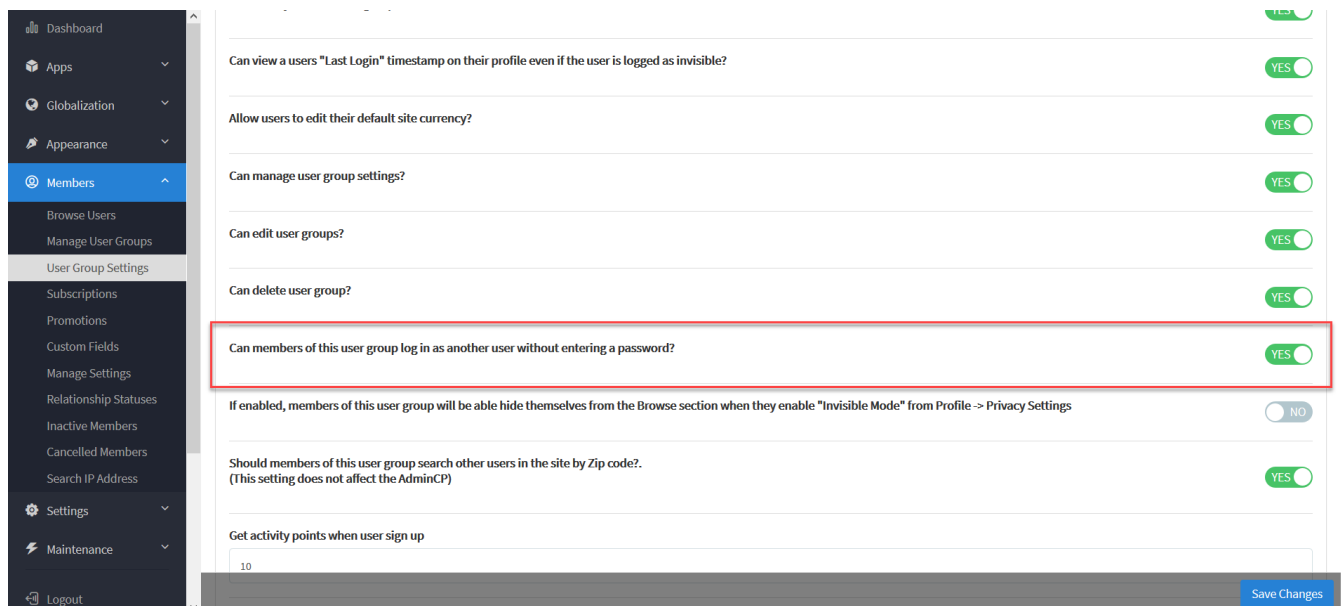

Note: Enable this feature only if creating a plug-in or modifying the package.

Can control privacy settings on their own profile? YES

Can control notification privacy settings? YES

Can override a users privacy setting? YES

Find and enable "Can members of this user group log in as another user without entering a password?" setting

Can view a users "Last Login" timestamp on their profile even if the user is logged as invisible? YES

Allow users to edit their default site currency? YES

Can manage user group settings? YES

Can edit user groups? YES

Can delete user group? YES

Can members of this user group log in as another user without entering a password? YES

If enabled, members of this user group will be able hide themselves from the Browse section when they enable "Invisible Mode" from Profile -> Privacy Settings NO

Should members of this user group search other users in the site by Zip code? (This setting does not affect the AdminCP) YES

Get activity points when user sign up 10

[Save Changes](#)

Select **Save Changes** to save the settings.

Now, to login, as another user, go to **Members > Browse Users** and then select **setting icon** from the user who you want to login as. You will see the **Log in as this user** option.
