After the installation is completed, you should remove the public/install folder to avoid security risks.

Setup Cron

Many features require cron to work. Please configure two following crons. You can get the cron command in AdminCP > Settings > Schedule page

Cron for Schedule runs *every minute*

```
php path_to_webroot/artisan schedule:run > /dev/null 2>&1
```

Cron for Queue runs *every 5 minutes*

```
php path_to_webroot/artisan queue:work --max-time=300 > /dev/null 2>&1
```

The MetaFox Installation is done. You can start to enjoy and go ahead to configure your MetaFox site.
