6	Support showing the friend suggestions when users use the mention feature (@) on feed or comment
7	In the Feeds of Photos: Increase the quality of the big photos
8	In the Photo Album listing page: Support "Feature album" action in the mass actions

Bugs Fixed

ID	Description
1	Fail to connect to the phpFox Store in AdminCP > Apps > Installed
2	User cannot view others' Profile & Info tab unless having permission to view that user's activities
3	The text "Recently Active" appears on the Browse Users page after searching for members
4	When adding a new phrase, the max length of text input is limited
5	From the Home page, the blank page displays if the users click on the "Site Statistics" block.
6	When clicking on the Gender field on a user Profile Info page, it redirects to the page where the filter search on Gender is "Any"
7	In the Edit Profile page, the layout of "Date of Birth" is not displayed fully on Window OS
8	If the site is using the 12-hour format, the event's time frame will be back to the default after making any changes to the event
9	The tagged users don't get notifications when someone likes the post
10	The deleted sticker is still showing on the home page
11	The pointer is displayed in the wrong position when the users edit a comment.
