

Set up policy, terms and other static pages

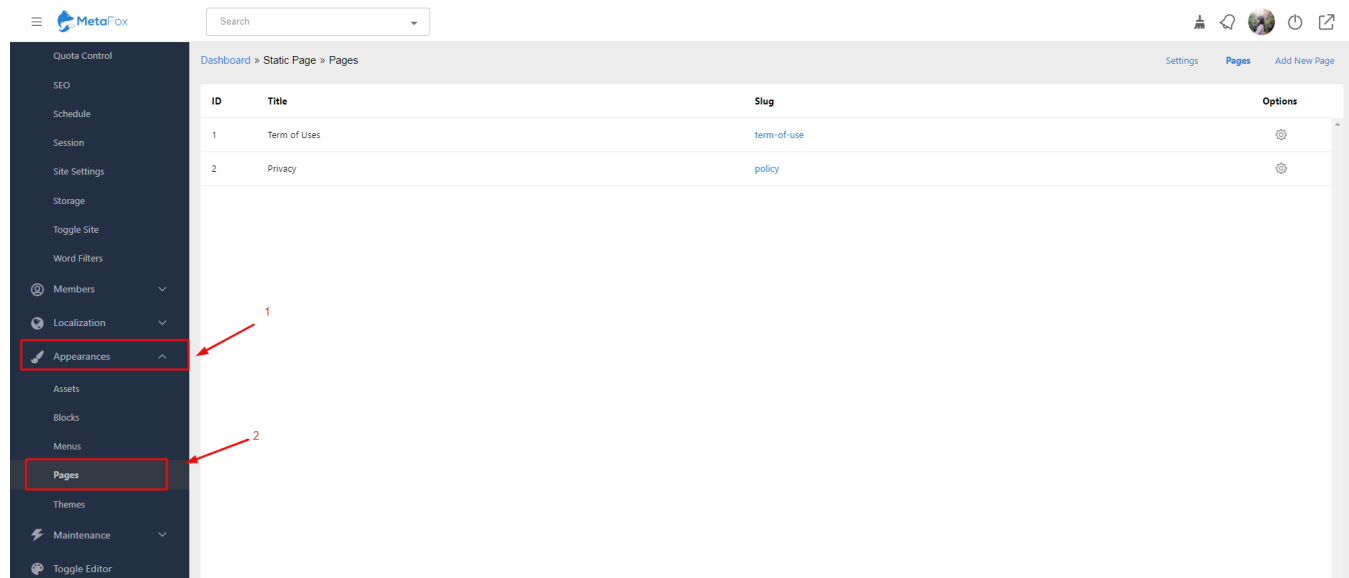

This tutorial will show you how to find and edit the **Term of Use & Privacy** well as create a new static page

*Find and edit the Term of Use & Privacy:

This assumes you are already logged in as the **Admin user** and are logged into the **AdminCP**.

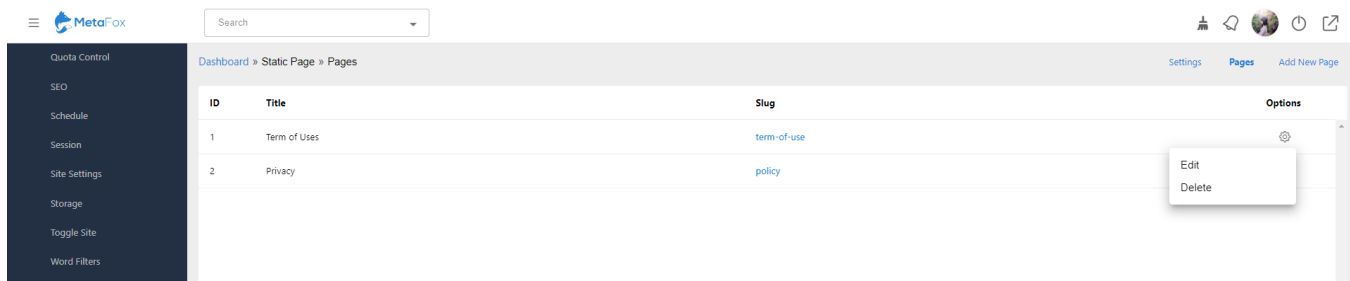

From the **Admin Dashboard>Appearances>Choose Pages**

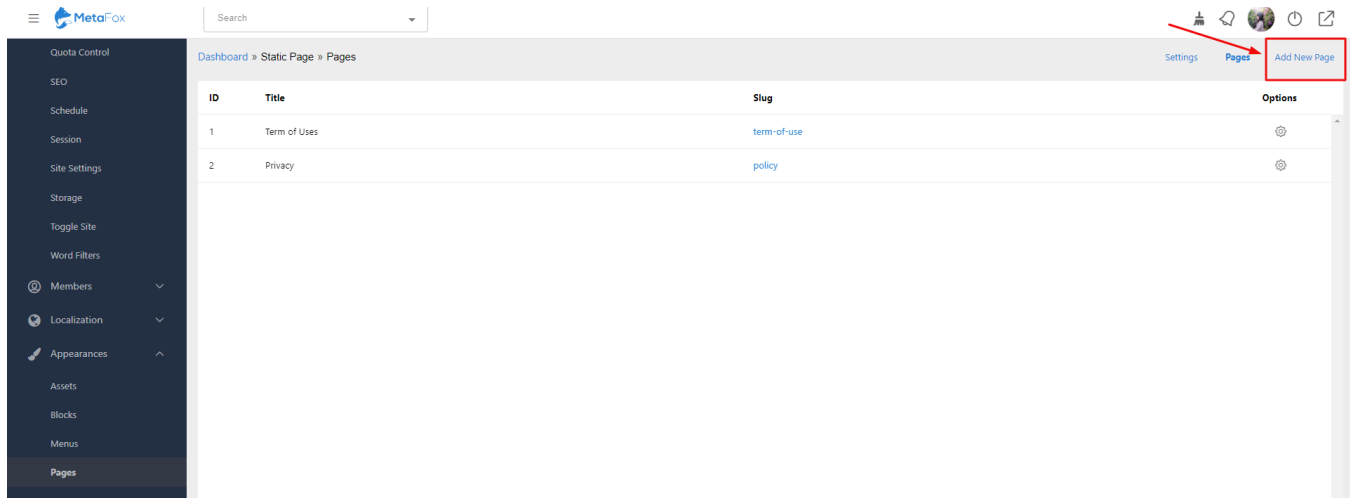

It will redirect you to the current Static Page items: **Term of Uses & Privacy**

On the right side, you can see the field **Options**>Click on the gear to **Edit** the content for **Term of Uses & Privacy** or delete them

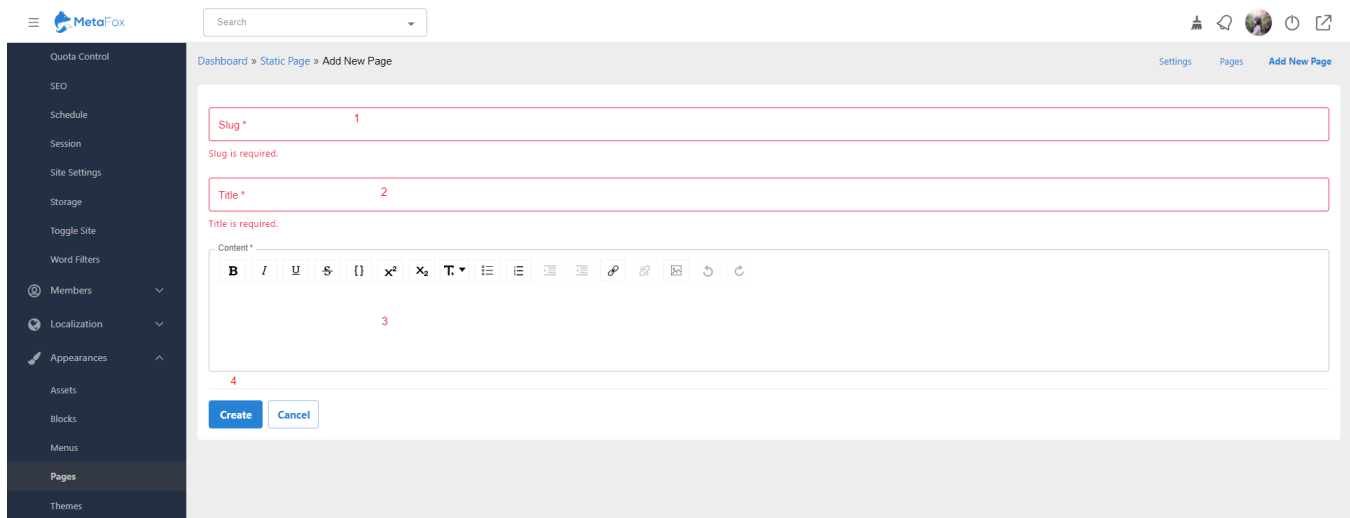

***Create a new static page:**

Back to the **Dashboard of the Static Page>Pages>Choose Add New Page**

Then, Fill in **Slug, Title & Content** for the new page. After that, hit the button **Create** to complete.

Tip: It's always a good idea to clear your site's cache after adding anything.
