## Configure site logo, favicon and site assets

This tutorial will show you how to change your site's appearance.

## Configure the site logo and favicon

This assumes you are already logged in as the Admin user and are now in the AdminCP.

From Apprearences> Assets>Input the keyword Logo or favicon into the field Search

Tips: Don't forget to clear the cache to display your new logo properly.

## Build site to apply changes

Under AdminCP > Appearances, you go to Themes > Rebuild Site. Then, click on Rebuild Site button. It may take a few minutes for the build process to complete and update the frontend (web).

Now, you can go ahead to change many other assets.
