

# Mobile app 1.7.1

## New Features / Improvements

ID	Description
1	Support API to customize items on the bottom bar
2	When changing new email address, show notice message to remind email verification
3	Reset the Search fields when getting back to Browser page
4	Show a number of friends on Friends menu
5	User can access directly to a poke after clicking on Poke notification
6	Admin can highlight members by featuring them
7	Tagged user can remove the tag by themself
8	Display Terms of Use & Privacy as a normal page within the app instead of a web view
9	Integrate Location Service with user phones
10	User can upload Live Photos on iOS app
11	Auto-refresh timeline after reloading Notification menu
12	Force logout banned users automatically

## Bugs Fixed

ID	Description
1	Show a grey image on feed item when a shared link does not have any images
2	When scrolling up or down, the app does not stop scrolling on the 1st tapping
3	Active users are intermittently displayed as Deleted User on mobile app
4	After disabling Activity Point app, get an error when tapping on the link of user items on User Profile
5	Photo popup viewer isn't closed smoothly
6	App gets stuck when uploading a large file in Offline mode
