Create Advertise placements

Assume that you can install Advertise app and enable it on your MetaFox site. We will guide you in creating Ads placement that defines the price, pricing model (Pay per click, Cost per mile), and which roles can view ads of this placement.

In this article, we will add an Ads placement on the Top Right Panel of the Home Feed page.

Let's log into your MetaFox site with the Super Adminitrator or Admin user. Then, go to AdminCP > App Settings > Advertise > Create New Placement. Then, fill all the details of Ads Placement as below screenshot.

We are configuring to charge users 1 EURO for 1000 views (CPM), and this Ads placement will be available for certain roles. You can let Viewable User Roles empty to make this ads placement available for all user roles.

Search		_				\mathcal{C}
Dashboard » Advertise » Manage Placements	Edit Placement	×	cements	Create New Placement	Manage Ads	Crea
Title	Title* Home Feed - Top-Right Block (Cost per Mille)			A	ctive	
Home Feed - Top-Right Block (Cost per Mille)	Description *	-			-	
Pay Per click	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$				-	
	Top-Right Ads block on Home Feed					
		┚║				
	Price					
	Placement Type*					
	Viewable User Roles Registered User & Administrator & Limited & Super Administrator &					
	No particular choices mean all users can view.					
	Cancel Save Chang	jes				

Now, go to the Home Feed page and enable Editor Mode. Choose Edit Page Content as we suppose to add an Advertise block to the Home Feed page only. If you would like to add a block into all pages, you can use Edit Site Content

Click on the Plus icon on the subside section to add a block into this area, as we would like Ads to display on the Top Right panel of this page.
