Set up Facebook Login

Since Facebook is one of the largest and most popular social network sites for the publicity, many people would like to use their Facebook accounts to join to other networks. By using Facebook Connect app, your users can join your community conveniently by logging in with their Facebook account.

This guide will instruct you to set up the Facebook login for your site using Facebook Connect.

Create a Facebook Application

- Go to Facebook Developers page and Login to your Facebook account.
- From header menu, select My App , then Create app

Enter the Display Name and Contact Email for your app and click on Create App ID to create your app. You might need to enter the captcha to verify.

Create a New App ID

Get started integrating Facebook into your app or website

Display Name

phpfox_demo

Contact Email

phpfox@phpfox.com

By proceeding, you agree to the Facebook Platform Policies

Cancel Create App ID

Choose Settings from the left menu >> Basic content will appear on the right.

<pre>phpfox_demo</pre>	APP ID: 2176126405942331	OFF Status: In Development View Analytics
Dashboard	App ID	App Secret
Basic	2176126405942331	Show
Advanced Roles	Display Name phpfox_demo	Namespace
Alerts		

On Setting content, you will see App ID. Click on Show button to reveal App Secret. Now you already have both App ID & App Secret to use with Facebook Connect app. However, you need to configure your Facebook app a bit more to make it fully work.

Choose Settings from the left menu and select Basic. Enter your website URL , App Domains, Contact email and hit Save changes

Input your Site Domains into Allowed Domains for the JavaScript SDK field.

Request required permissions for Facebook Login

Facebook Login requires 2 permissions with access level of Advanced Access: public_profile and email

At this step, you can go to the App Review > Permissions and Features, search 2 permissions of public_profile and email then request for Advanced access as the below

🕫 Meta for Develop	ers			Docs Too	ols Support My Ap	Q Search developer documentation	n 🖉 🔞 Paul Ke	I - ()
phpFox V5 Demo	x V5 Demo 👻 App ID: 484766443667859 App Mode: Development 🔵 Live							(?) Help

i≘ Activity log		Business Asset User Pri The Business Asset User Pri User Fields for users engagi Ids_for_business, name, and ① Full description ①	ofile Access ofile Access feature allows your app to read the ng with your business assets such as id, picture.) Requirements	Standard access	• Active (12)	 No App Review requested 	Request advanced access	

You will need to follow Facebook guide and provide necessary info if needed to complete the permission requests.

Now you finish setup your Facebook app. Go back to **Dashboard** and note down **App ID & App Secret** of your Facebook app. We need these 2 information for next step.

Set up Facebook App on MetaFox site

Let's log into your MetaFox site with Admin user and go to AdminCP, go to App Settings > Social Connect > Facebook

From here you can see following settings:

≡	MetaFox	Search 💌	C	<u></u>	25	\bigcirc	Z
	Friend	Dashboard » Social Connect » Facebook	Facel	book	Google	Apple	e
	Group						
	Like	484766443667859					
	Live Video	Client Secret*					
	Marketplace	bce53					
	Mobile Services	Redirect URL*					
	Music	https://demo.metafox.app/					
	Notification	Enable Facebook login					
	Page						
	Payment	Save Changes Cancel					
	Photo						

- Enable Facebook Login: Enable/disable login via the Facebook account. We choose to Enable in this case to enable Facebook login.
- Client ID: Enter here your App ID of the Facebook app.
- Client Secret: Enter here App Secret of the Facebook app. Select Save Changes to save the settings. You have successfully setup for Facebook login.
